

# ***MERV Rated Pleats***

## ***MERV 9.1 & 13***

- ***Durable frame components with diagonal supports for demanding conditions***
- ***Reinforced pleats with metal grid for maximum media utilization***
- ***Air filters that balance high performance with maximum longevity***
- ***Efficiency increases from a higher starting point when dust holding begins***
- ***Low pressure drop to maximize airflow while reducing energy costs***
- ***Spanphase Resources pleated filter line delivers consistent value and quality***

***Operating in industrial, commercial, pharmaceutical, government, education, aviation, manufacturing and institutional applications.***

***Made in Michigan***

## **2" & 4" Depth Pleated Filters**

24 x 24	16 x 20	20 x 25
16 x 20	18 x 20	12 x 24
16 x 25	18 x 24	20 x 20
Custom Sizes	20 x 24	Call for 1" Sizes

- **Media: 100% synthetic non-woven, media that can be recycled. Engineered with a gradient density composition that achieves a MERV rating using the mechanical method of particle capture.**
- **Media does not rely on an electrostatic charge to capture particulate, electrostatic charge dissipates over time.**
- **Media Support: Expanded metal is laminated on the air leaving side to provide pleat stability during operation.**
- **Pleat shape is maintained allowing full media utilization which maximizes DHC.**
- **Pleat Design: V-Pleat design aids in pressure drop while reducing energy cost. Design allows for maximum airflow and DHC during the life of the filter.**
- **Frame: Heavy-duty, two piece, moisture-resistant frame with diagonal support members. Frame is bonded to the media at all points of contact for unsurpassed frame strength. Interlocking corners and positive media-to-frame seal reduce the possibility of air bypass.**
- **Operating Temperature Limits: Maximum operating temperature is 180°F (82°C).**
